Care of specific problems

Hints on bathroom cleaning

By SHIRLEY W. WALTON
Extension Agent

This week I will share with you information on how to take care of specific problems in the bathroom. These problems relate to cleaning and maintaining your bathroom for the best possible working conditions.

CLEANING THE BATHTUB

**For an extremely stained tub, use a mixture of peroxide and cream of tartar. Make a paste and scrub vigorously with a small brush. Rinse thoroughly.

**If stain persists, spread the above mixture over stain and apply a drop or two of household ammonia. Allow to set for two hours before scrubbing.

**Very old porcelain stains can be cleaned by shaving a bar of Naphtha soap into a bucket of hot water and add ½ cup of mineral spirits. Stir to dissolve the soap and then brush on stain vigorously. The amount of water is approximately 1½ gallons.

TUB AND SINK CLEANERS

**Light stains can often be removed by simply rubbing with a cut lemon.

**For dark stains, and especially rust, rub with a paste of borax and lemon juice.

**To brighten up a bathtub which has yellowed, rub with a solution of salt and turpentine.

HOW TO REMOVE BATHTUB DECALS

**Soak decals in mineral spirits, then scrape away. Spray down with a spray cleanser and rub with the abrasive side of a sponge. Now wax the entire tub, tiles, faucets, etc. with Turtle Wax. It will shine like new. Turtle Wax is an excellent cleaner and refinisher.

**Rub in Turtle Wax well with a soft cloth and let stand for a few minutes. Do not let it dry. Polish with a good clean cloth or buff with a hand electric buffer. Your bathroom will gleam like new.

CLOGGED SHOWER HEADS

**If shower head is clogged, try boiling it in ½ cup vinegar and 1 quart water for 15 minutes.

**For plastic shower heads, soak in equal amounts of hot water and vinegar.

CERAMIC TILE

**Before you start cleaning the walls or tiles, run your shower a while with the hottest water possible. Dirt loosened by steam will come off much faster.

**For light jobs, wash with a solution of ½ cup ammonia, ½ cup white vinegar, ½ cup washing soda and 1 gallon warm water.

**For excessive stains, make a paste of baking soda and bleach. Then scrub with a small brush and rinse thoroughly.

HEAVY SHOWER STALL FILM

**Rub lightly with a plain piece of dry, fine steel wool--not the soap filled variety. Try a patch first to be sure that it isn't scratching your tile. If it is, you should use a finer piece of steel wool. As you scour the tile, you will see the scum coming right off. Wash down after the job is completed.

WASHING SHOWER CURTAINS

**Fill the washing machine with warm water and add two large bath towels. Add ½ cup each of detergent and baking soda. Run through the entire wash cycle. However, add one cup vinegar to the rinse water. Do not spin dry or wash vinegar out. This method will not work without the bath towels. Hang shower curtains immediately. Wrinkles will disappear after the curtain has thoroughly dried.

REMOVING MILDEW FROM SHOWER CURTAINS

**To prevnet mildew, soak in a solution of salt water before hanging the curtains.

**Use baking soda to remove mildew from small areas.

**Stubborn stains on light colored curtains--wash in the above manner, followed by a rub-down with lemon juice.

TOILET RINGS

**Flush toilet to rinse sides. Apply paste of borax and lemon juice. Let set for two hours and then scrub thoroughly.

**Or you may rub the ring with a fine grade of sand paper. If the rings are years old, try what is called a wet-dry sand paper, which is available locally at hardware stores.

If you have a homemaking question or problem, you may call 352-8244 or you may write P.O. Box 488, Appomattox, VA 24522. It is always a joy and pleasure to hear from you and to help you.

Have a good week!
